

CHAPTER TEN

ETERNAL BY JEFFREY COURT™

CHAPTER OUTLINE

**Introduction**

Jeffrey Court is excited to celebrate 30 years of business. To honor this monumental milestone, we are delighted to announce the release of our anniversary collection, Chapter 10 Eternal by Jeffrey Court™. This collection is made up of seven mini collections, each paying homage to key milestones throughout our history and celebrating Jeffrey Court moments in our customers' homes.

When developing Chapter 10, we knew it had to be bold and colorful. Each mini collection is themed with a specific colorway and uses a base marble that guides the overall aesthetic of the series. Additionally, you will find one-of-a-kind mosaics and stunning field tiles in an array of materials including glass, ceramic, terrazzo, marble, and shell. With design in mind, the items in each collection work seamless together or can be cross-merchandised for more unique looks.

Key Features**1. Fete**

An acknowledgement that not all celebrations have to be a formal affair, Fete marks Jeffrey Court's establishment in 1991. General Installation Tips

General Installation Tips

1. Blending and Shade Variation

- To achieve your desired look, Jeffrey Court recommends that you inspect and confirm the tile and layout prior to installation. Installation of tile constitutes acceptance.
- For natural stone collections, it is highly recommended to blend products from multiple cartons to ensure a proper uniform look. All issues pertaining to shade variations should be addressed prior to installation.

2. Rating

- For specific item-by-item shade variation rating, please reference each product-specific web page on JeffreyCourt.com.

3. Setting Material, Sealers and Grouts

- A high-quality white thinset meeting ANSI 118.4 or 118.11 is recommended for best installation results. Always check with the setting material manufacturer to ensure suitability of material in setting tiles. A grey mortar, mastic, or adhesives could stain or alter the color of the product.
- FOR GARDEN PARTY 10" X 20" EMERALD FIELD TILE Jeffrey Court recommends the following setting materials. Please follow the installation instructions recommended by the setting material manufacturer.
 - Epoxy Based:
Customs EBM-LITE
Mapei KERAPOXY 410
Laticrete Lataproxy 300 Adhesix
 - Cement Based:
Ardex N 23
- The proper notched trowel is required to compensate for some minor thickness variations on the field tiles that are possible with this natural semi-calibrated product.
- As per the Tile Council of North America (TCNA): "For cementitious grout, joints smaller than 1/8" generally should only be grouted with unsanded grout."
- Grout color is part of the design process and considerations must be made. A grout choice closest to the color and hue of the tile being grouted can be considered the safest choice. Contrasting grouts are not recommended.
- A "natural look" penetrating sealer is recommended and should be used before and after grouting. Sealing before grouting will ease the cleaning process and will reduce the possibility of staining from colored grouts. Sealing after grouting will ensure that both the grout and natural stone are protected from daily use. It is recommended that the sealer manufacturer's recommended maintenance regimen be followed as part of ongoing care during the lifetime of the product.

4. Cutting

- A professional-grade wet saw outfitted with a high-quality diamond blade designed for cutting tiles is recommended. Always cut tiles with the face up.

5. Cleaning

- Regular sweeping or vacuuming is recommended prior to cleaning with a PH Neutral Cleaner.

Terrazzo Installation Tips**1. Blending and Shade Variation**

- To achieve your desired look, Jeffrey Court recommends that you inspect and confirm the tile and layout prior to installation. Installation of tile constitutes acceptance.

2. Substrates

- All suitable substrates must be clean and free of any contaminants such as dirt, oil, or sealers.
- All substrates should be flat prior to beginning install to prevent lippage.
- Waterproofing membrane should be used with slab when moisture is present. As always, we recommend following the waterproofing manufacturer's instructions.

3. Setting Material

- A high-quality white polymer mortar for large format tile is recommended. Examples of suitable mortars include:
 - Bostik Large Format Floor™ Polymer- Modified Mortar for Large Format Tile
 - Custom Building Products Flexbond®-LFT Premium Crack Prevention Large Format Tile Mortar
 - Mapei Ultraflex LFT Premium, Large-and-Heavy-Tile Mortar with Polymer

4. Trowel Size

- A 1/2" x 1/2" x 1/2" square notched trowel is recommended
- Tiles should be back buttered to achieve a good mechanical bond

5. Grout Joint

- A 3/16" grout joint is recommended to achieve a seamless look

6. Grout

- Cementous sanded grout and urethane grouts are suitable
- Staining of Terrazzo may occur if Terrazzo is not sealed prior to grouting when using a darker color grout

7. Sealer

- A high-quality penetrating sealer is recommended to be applied to the Terrazzo before and after grouting

8. Care and Maintenance

- We recommend using a PH neutral cleaner for routine cleaning
- Dust mopping or sweeping is recommended to keep the surface clean and free of debris
- Sealing is required as part of the ongoing maintenance of Terrazzo tiles. Refer to the sealer manufacturer's guidelines for frequency of reapplying sealer.
